*Manager Compliance Questionnaire*

June 30, 2013

---

1. Have there been any changes in your organization? Have you undergone any change in ownership or control?

There have been no changes in the organizational structure, ownership or control in 2Q 2013. FIA does not anticipate any significant organizational changes in the next twelve months that would change the current ownership structure.

2. Have there been any changes in your investment philosophy?

There have not been material changes in the fixed income investment philosophy or process in 2Q 2013 nor does the team currently envisage any major future changes to the process. Since inception, FIA has continually developed refinements to the investment process and systems to maintain a competitive edge, in keeping with the overall investment philosophy.

3. Have there been any changes in your staff of investment professionals?

There have been no changes in the staff of investment professionals at FIA.

4. Have you lost a substantial amount of business (amount of percentage of assets under management)?

No, there has not been a substantial amount of business lost in 2Q13. Net client flows and portfolio re-balancing has reduced assets under management by less than 5%.

5. Have you gained a substantial amount of business (amount of percentage of assets under management)?

No, there has not been a substantial amount of business gained, although some existing clients have added to portfolio assets.

6. Have there been any new investigations begun by any state or federal government or their agencies, or any charges filed, with regard to any division or unit of your company, and in particular anyone who directly or indirectly performs services for this client? Please provide details (if there is any doubt, please err on the side of providing too much information).

There have been no new investigations begun by any state or federal government or their agencies, or any charges filed, with regard to any division or unit of your company, and in particular anyone who directly or indirectly performs services for this client in 1Q 2013. Additionally, this disclosure does not represent an admission of any wrongdoing.

7. For managers, with fixed income portfolios that we monitor, are you currently invested in commercial mortgage backed securities (CMBS)? (If yes, please give % of fixed portfolio)

FIA do not invest in any synthetic securities including CMBS (please see answer to 8.)

8. Are you invested in any unhedged and/or leveraged derivatives?

FIA does not use derivatives or leverage in its portfolio strategy, with the exception of forward foreign exchange transactions ("forwards") to hedge currency exposure, where required, helping to manage the overall risk profile of the strategy. All of FIA's global fixed income strategies, including those represented by the submitted performance, can be described as: cash bond, long only strategies that do not use leverage or synthetic securities (such as CDO, CDS, CLO, CMBS), as mentioned above the only derivatives used are forwards, for hedging purposes.

FIA does not use derivatives in its portfolio strategy; however, the managers use forward foreign exchange transactions ("forwards") to hedge currency exposure, where required, helping to manage the overall risk profile of the strategy.

9. What percentage of equity is international?

The manager must immediately notify the Board and the Consultant when the international exposure reaches ten percent (10%). An explanation will be needed as to why the manager is changing their discipline. (This does not apply to managers that are 100% international equity and to those that have been previously given permission by the board and the consultant)

EXPLANATION OF RISK/REWARD SCATTERPLOT GRAPHS

---

*The crossing lines represent the 5-year return (horizontal line) and 5-year standard deviation or volatility or risk (vertical line) of the index against which the Fund is being measured.*

*Each point represents the Fund's 5-year return (vertically) and standard deviation or volatility (horizontally), relative to the index. If a point is in the southwest quadrant, for example, the 5-year return of the Fund has been less than (below) the index line, and the 5-year standard deviation (volatility) has also been less than (to the left of) the index line.*

*There are four points, one for each of the last four quarters. The earliest one is the smallest and the quarter just ended being the largest. Each point shows the 5-year relative position of the Fund versus the index for that quarter. The movement of the points shows the trend, or direction, over time.*

*As noted in the graph, the best place to be is the northwest quadrant (less risk and a higher return); the worst place to be is the southeast quadrant (more risk and a lower return).*
